PROJECT NAME: Ft. McClellan Site Reconnaissance | PROJECT NO.:

FIELD ACTIVITY SUBJECT: Ecological Survey

DESCRIPTION OF DAILY ACTIVITIES AND EVENTS:

Summary - Meeting BRAC Clean-up Team (BCT) for review & reconnaissance visit of Ft McClellan. Focus on Cane creek and Cave creek; also to visit specific sites on Main Post and Pelham Range. Later in week, IT ecologists to perform and complete detailed ecological site reconnaissance.

3/2/98 Left IT/Knoxville 9:40 a.m (EST)
Rain started in AL at 12:00 (EST) / 11:00 (CST)
Rain only intermittant; partly sunny (40's °F)

(11th) Chemical Munitions? - stream behind parking lot 5-6' wide. Small pine tree canopy. Light Brush Stream bed rocky. Steel Pipe across creek. Storm drain outfall, draining from ??? Road crosses stream (bridge) Deer tracks and raccoon tracks (deer droppings) all along muddy area near stream in area where trees have been torn down. Silt in sides in small stream on down from paved area. Further downstream Beaver dam (Lodge) Extensive evidence of beaver activity (chewed trees, etc.) and Beaver dam ~~Significantly~~ 30 yds upstream of wooden railroad tie foot bridge. (Good place to sample just upstream of Beaver Dam 1) (Yucca plants)

VISITORS ON SITE: Many IT - Mike Agnes Ag
EPA - Barb, Bobbie
Gannett Fleming - Jennifer
Ellis, Tim, Lisa, (men)
Corps - Geologist

CHANGES FROM PLANS AND SPECIFICATIONS, AND OTHER SPECIAL ORDERS AND IMPORTANT DECISIONS.

WEATHER CONDITIONS:
Overcast, cold (40's °F)
No rain between 2:30 - 5:30

IMPORTANT TELEPHONE CALLS:

PROJECT NAME | PROJECT NO.

FIELD ACTIVITY SUBJECT

DESCRIPTION ON DAILY ACTIVITIES AND EVENTS

For corner of fence line storm grate, then it dumps into creek just below foot bridge. Run-off from mid fence line from wash racks catch basin. Runoff goes to creek. Sample site should be just up of the golf course but just below outfall that drains parking area at far end of

Former fog/oil storage - drainage ditch on the side of the road drains the interior area. The area, however, is not clearly delineated. A culvert goes under road

Land fill (I) - stream runs under road. Drainage ditch runs parallel to road

Auto Craft Shop (24hr Car Wash) - Creek behind Car Wash on other side of fence line (2 outfalls). Culvert comes from under the ground at end of stream and opens back into creek 40 yds from end of fence line (Rabbit ran from grassy area near creek)

Old Flame-thrower Range - drainage ditch just off of road. Site is just up from the car wash. Young Pines, Flat Rocky, sandy. Deer bones found. No standing water on site. Boundary restrictions probably will not be an issue. Deer Tracks

FIELD ACTIVITY DAILY LOG

PROJECT NAME: Ft McClellan | PROJECT NO.

FIELD ACTIVITY SUBJECT: Site Scoping for habitats / hotspots

DESCRIPTION OF DAILY ACTIVITIES AND EVENTS:

GSA area (9:40) - Land use 100% industrial/military. Channel by the southwest corner of the property has some sediment deposition areas. The channel has artificial rock walls. Concrete changing channel bottom from cobble stone to concrete, some vegetation (SW corner). 1 sample (SD/SW) potential sediment and surface water sampling locations at above

Site 15 (7) a pipe running under road from bldg. 257 ~~256~~ draining building (~~South~~) flows south toward Cane Creek. outlet of pipe empties into wooded area adjacent to Cane Creek. observed dry pooled at area, Cane Creek is very channeled & developed. (Surface soil/dry sediment in flood plain; Surf. wtr/sed downstream, no direct discharge to creek.

1015 Motor Pool area; building 67 (7) very developed; parking lot; some maintained lawn; Building Nos. 234/~~238~~

1023 Photo A5 _ edge of GSA area; south adj. to South Branch some open, maintained lawn. Storm water drain map

1046 Former Motor Pool 2000 - gas station (1940's ca.) go cart location runs adj to South Branch.

VISITORS ON SITE:	CHANGES FROM PLANS AND SPECIFICATIONS, AND OTHER SPECIAL ORDERS AND IMPORTANT DECISIONS.

PROJECT NAME | PROJECT NO.

FIELD ACTIVITY SUBJECT

DESCRIPTION ON DAILY ACTIVITIES AND EVENTS

1055 Auto Craft Area (site 100(7)) - stored Freon canesters, oil/grease products (revisited from yesterday)

1100 Behind Auto Craft Area - on the SE side of fence there's a drainage ditch that drains to the ~~SW~~ SE direction;

1105 flow apparently ends up flowing through depressed flood plain ~ 50 yds before discharging into creek. Creek very rocky (bed rock), fast moving stream.
- 2 photos

Eliminate (many) found right at apparent discharge from flood plain

Old concret pad found ~100-150 yds SE of Auto Craft Area fence, also found old water piping

~~Sight~~ Site samples - one in ditch; one in flood plain near fence; one SD/SW at discharg.

1124 North end of Auto Craft Shop (2 photos)

1134 Flame Thrower Training Area (1 photo) just south of Auto Craft Shop Area

1140 / 1240 Break for lunch

1255 DEH Area Sites (64(7), 1(7))
Pesticide Storage, Haz Wst Building (No. 208)
Pestigde hit in previous sampling location behind
old Pestic. storage building (No. 211) near drainage. SW fence
On opposite side of DEH Area fence (SW) there is a
parking lot (~ 30 yds wide) then ~ 10 yds of
mowed grass before Cane Creek. Drainage
throughout site flows through sewer lines,
possibly discharging to Cane creek.

On ~~West~~ NW AG end fence, large drainage pipes coming
from site, leading to standing water area
(photo A18), cat tails.

Water flow from storm sewer discharge draining
DEH (photo ~~A20~~)

1332 Training Aids Building (Service Center #267) B AG
surrounded by mowed grass & stands of pine
trees (photo A22); parking lot & open area.

1345 old Hospital area [site 95(7)]
surrounded by maintained lawn & open area
Drainage ditch passing through middle of site
drains to Cane Creek. No sampling for SD/SW.
(photo A23)

1355 Former Motor Pool Area ~~&~~ CC [sites 164(7), 11(7),
68(7), 12(7)] at SE corner of area, small
creek flowing S along E side of area.
cobble/gravel substrate w/ sporadic deposition
(photo A24).

1405 Open area, parking lot (A25 and/or B1)

FIELD ACTIVITY SUBJECT: Continue Ecol Recon & Sample location

DESCRIPTION OF DAILY ACTIVITIES AND EVENTS:

0805 Large Group meet at Lisa/Ron's office conf. room

0845 Start off to Northern area of FtMc

0900 Arrive Lk Reilley
Hiked ~~along~~ southern bank of Lk.
Mid-south bank. Obsrvd seepage from bank into Lk. Potent SD/SW sample site 1
Another location 5 yds east of first site; obsrvd seepage area with sheen.
Third seep area ~50yds east of 2nd site & ~10yds east of a little storage house (brick) on the Lk edge. High siltation & aquatic plants.
Small fish pool noted along Lk edge
Sited kingfisher flying over western portion of Lk.

Fourth site on south bank near SE corner of Lk.
Sheen noted at bank ~5yds west of a surface drainage pathway etched into southern hill opposite road. Flow discharges to Lk ~10yds ~~from~~ east of 4th site.
Collect soil up in hill-bank & SD/SW where discharge gulley empties into Lk. (5th)

VISITORS ON SITE:

FIELD ACTIVITY SUBJECT

DESCRIPTION ON DAILY ACTIVITIES AND EVENTS

0930 Still at Reilley. Eastern edge of Lk starts marsh wetland area. Take 6th SD/SW from this area

Aerial photo needed to determine extent of landfill to south.

Aerial photo to determin impact to swamp/pond situated east of Lk.

Significant water flow obsrvd flowing east-west from swamp/pond toward Lk.

0945 Walked back to west edge of Lk. Opposite side of bridge, seep/spring discharge to surface water body flowing north to NW direction away from Lk. Obsrvd many small fish

0950 Walking foot-bridge looking to west of bridge. Obsrvd white foam collected in depositional area

1012 Site 229(7) Ground scar/mound fill stopped at NW corner for photo; also took photo of 155(7) open pit (ESE site). No aquatic habitat; very wooded

1030 Stopped at probable fill area at Range 30 (21 acres). Creek feeding Reilley Lk/swamp/pond crosses road (under), but is dry.

1033 Drove closer to Firing range mound/hill. Obsrvd seep coming from range direction. Hill is very wooded. Valley area around seep is young tree/shrub. Dump items noted: construction debris, T.V. case, military vehicle/tank

FIELD ACTIVITY SUBJECT

DESCRIPTION ON DAILY ACTIVITIES AND EVENTS

1040 still at 231(7) site. Range 30.
① Range site marked by numerous seeps draining down slope toward fill area

② Potential fill area

Obsvd deer tracks & bird nests in tree/shrubs; Nesting burrow; woodpecker

- general dumping ground; above-ground UST (500 gal) old TV, personnel carrier

1105 236(Q) Drain field ~~site~~ within wooded area
FtMC sewer map (referenced) in ESE report.

1110 Lunch break to 1210

1215 Site 83(7) Golf course maintenance shed.
Potential pesticide release; borders golf course open area with sparse tree stands; about 20yds between shed & Cane Ck.

Outfall from shed side of Cane Ck delineates a dramatic boundary between vegetated & unvegetated potion of ck.; depositional area ~30 yrds downstream of large outfall pipe. Stream ~~bottom~~ bottom primarily bed rock

1230 Also noted sewer grating immediately adjct to shed; several lines meet at grating; terrestrial inverts (ants, honey bees) and vegetation obsvd near grate.

PROJECT NAME | PROJECT NO.

FIELD ACTIVITY SUBJECT

DESCRIPTION ON DAILY ACTIVITIES AND EVENTS

1235 From Golf maint. shed (north), site 23(7) is a boiler plant: building with brick ~~smoke stake~~ stack. Above-ground USTs on site. Wooded area behind building; open industrial/developed area front

1240 Site 90(7) same as site 23(7). Wastes disposed of via sump & drains. Sump pumped out filled & sealed. Sump location & potential soil, SD/SW only determinable by aerial photos. (ESE site)

1247 Site 172(7) - former printing ~~bus~~ shop; no aquatic on site; building up on mound ∴ seeps not likely; sparse woods & open lawns

1254 Site 14(7) - Boiler Plant from parking lot of site 16(7)

1259 Site 16(7) - large parking lot on site of FMP Area & Frmr Decon Complex. Stream behind parking lot. Stream heavily vegetated & forested on either side. Drains ~~May Branch~~ to Cane Ck. Cobble substrate, normal stream with ~~minimal~~ depositional areas. Noted minnows Probable sampling on NE corner of lot. Rusted drum lying near building. Also N of drum & trash bin is an area where wet ~~area~~ grass/moss has dried. Bladderwort

1315 Site 143(7)/FMP 1300 with Wash Rack Area? ~~(not~~ location of wash rack area unknown (not obvious) site drains to SW corner. Standing water immed. outside SW corner fence & drainage path into woods toward W/SW.

Grass along West fence is wet; high water table?

SHEET	5	OF	7

PROJECT NAME | PROJECT NO.

FIELD ACTIVITY SUBJECT

DESCRIPTION ON DAILY ACTIVITIES AND EVENTS

1330 Site 174(7) - Weapons Storage / Boat storage Flamable / Haz Wst storage. Drainage off of site flows to ditch along N fence & eventually toward W to Cave Ck. SD/SW from NW corner of site.

1340 (S. Site 168) Fmr wash rack w/oil-wtr separator. East of site, large parking lot. To W is forested area.

1345 Site 140 - Fmr gas station now used for storage. Open lot surrounded by woods to West & N, and wetlands to E; road to S.

SD/SW sample from NE corner of fenced area. Confirm gas station location from aerial photos.

Wetlands looks like a flooded foundation. Concret surrounding pool in a square orientation; uniform depth of water w/ layer of sediment.

Noted frogs & tadpoles along S edge of wetlands

1356 Site 46(7) - Chem laundry / Bakery; fenced area open lot surrounded by woods. Cave Ck runs along SW corner of fenced area.

Noted badly deteriorated / polluted portion of Cave Ck along southern fence line of site. Over-turned trash can; iron-orange solids & sheen on water body

Farther E along S fence (~20yds) still orange w/ oily sheen on water, seep & drainage gully; SD/SW
