HISTORICAL PHOTOGRAPHS

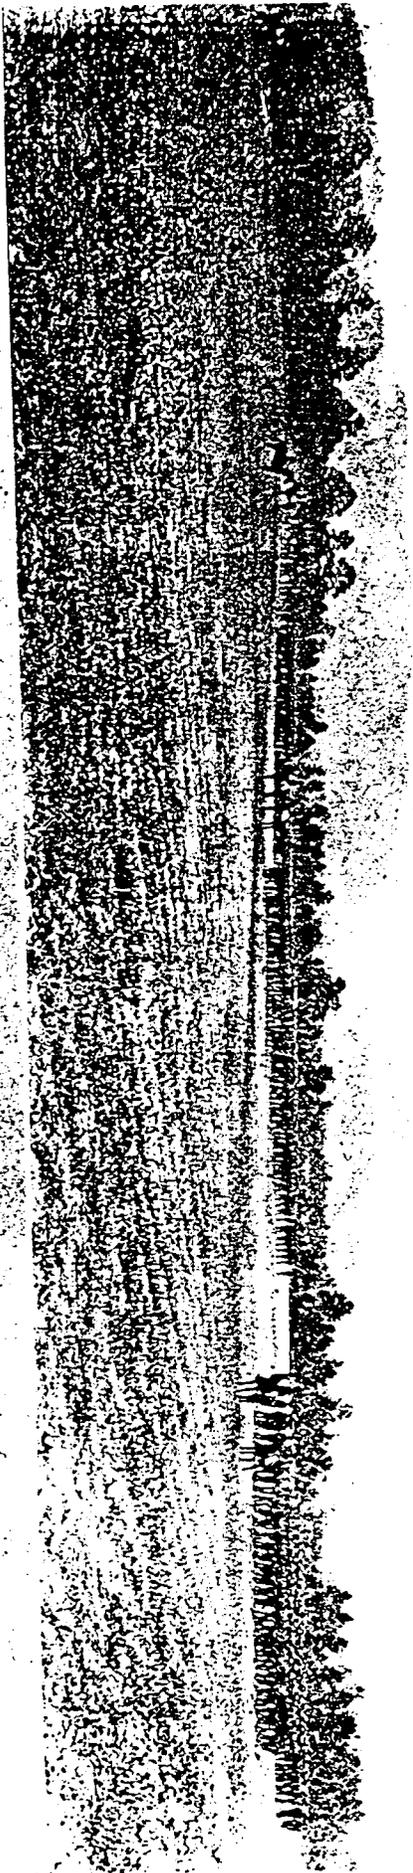

Copyright 1917, L. L. C. & Co.—Field Gun in Action at Camp McClellan

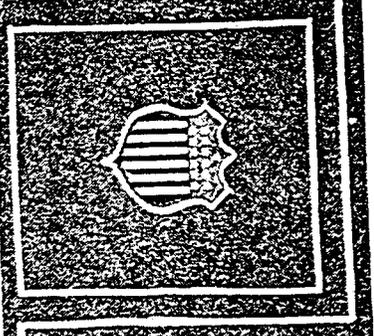

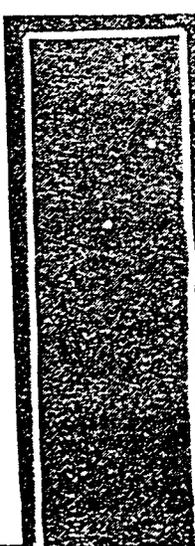

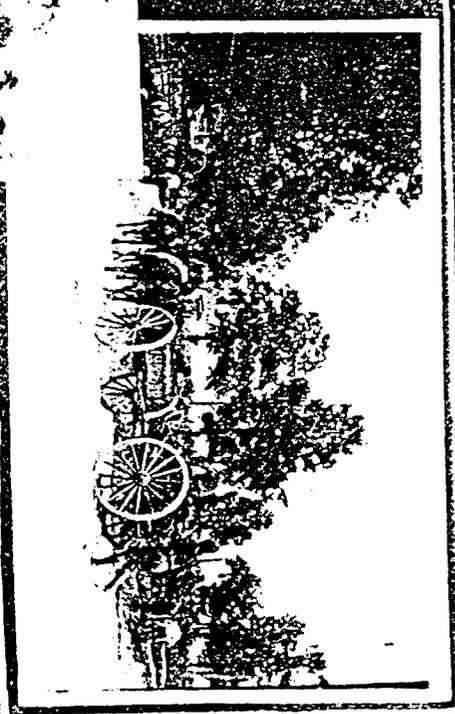

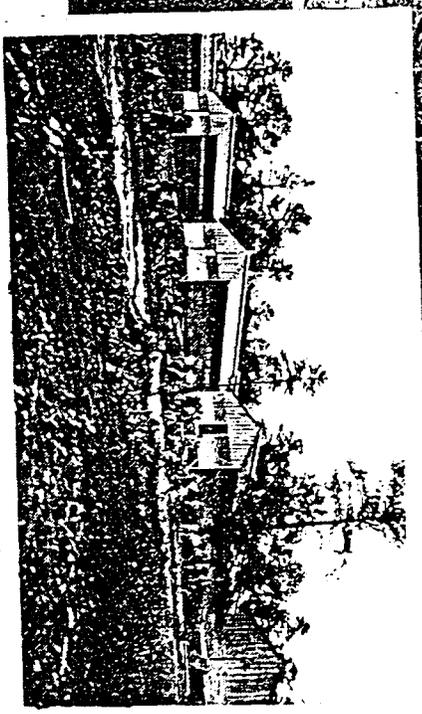

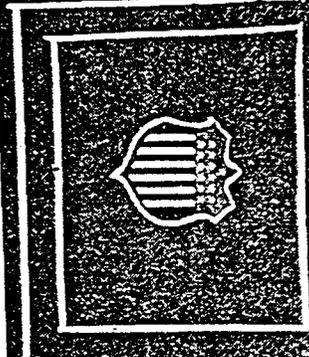

One of the Hundreds of Batteries in Action, and (lower center) a Major with Signal Corps giving instructions. These men will receive intensive training in every phase of modern artillery warfare. The operations depend upon it, when they shoot, they are depending on it.

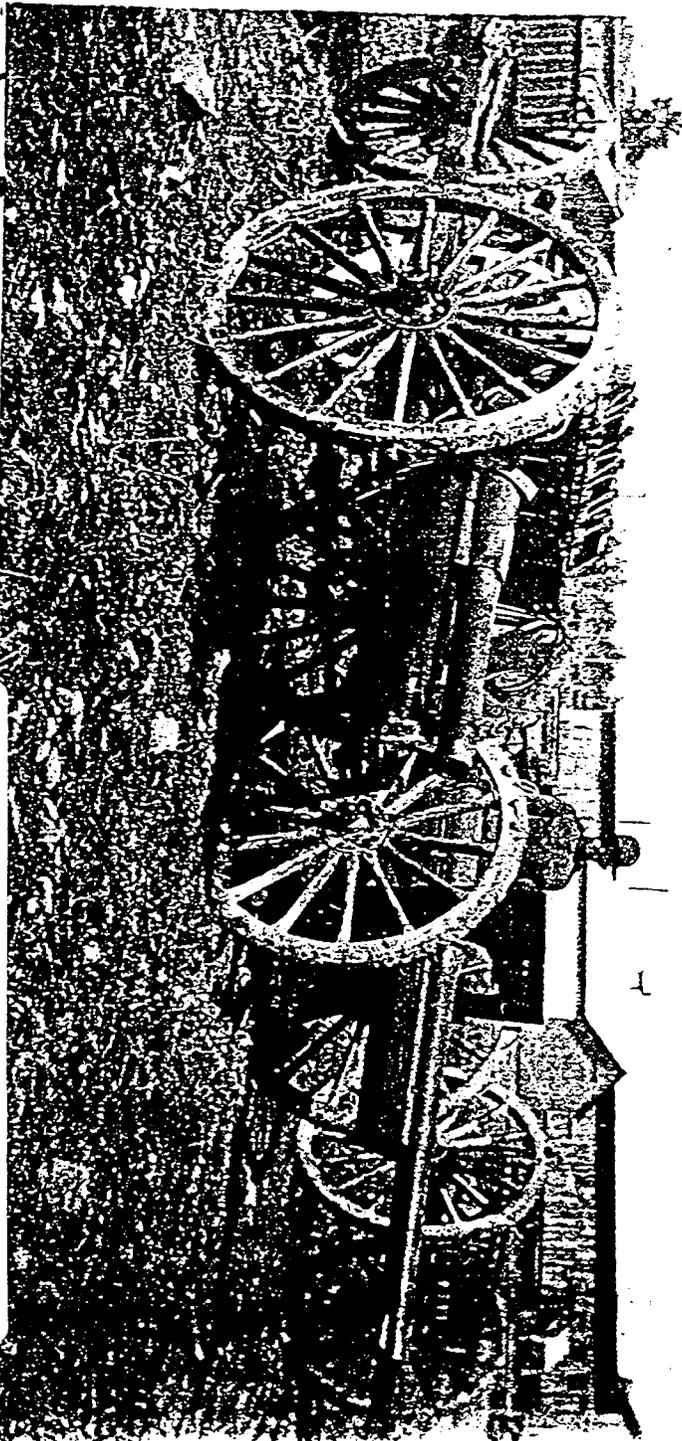

6 INCH FIELD HOWITZER, WORLD WAR ONE
CAMP MCCLELLAN

These pictures will give you some idea of the way the fields have been cleared for drilling purpose. In the upper picture is the Fourth Virginia and in the lower is the Second Virginia.

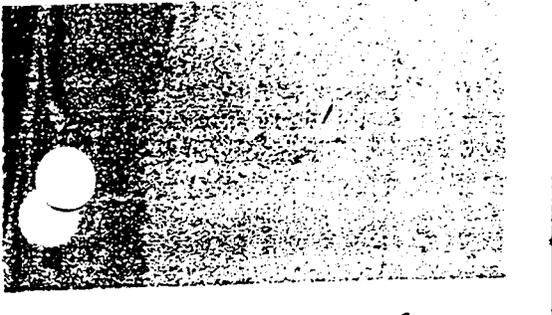

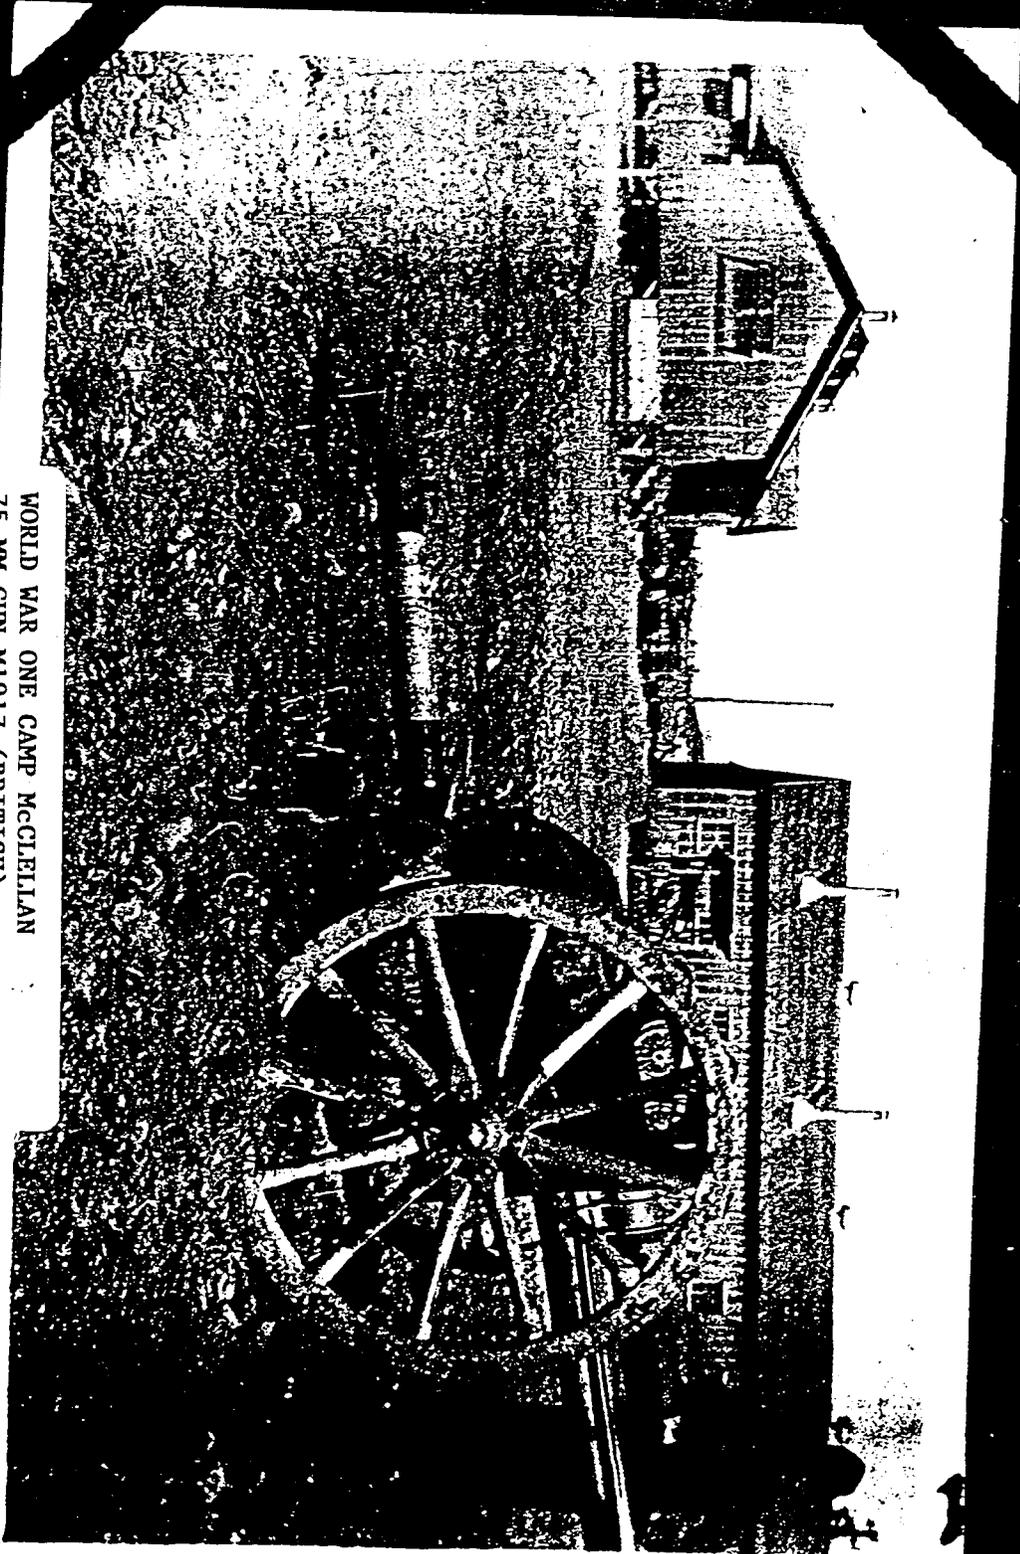

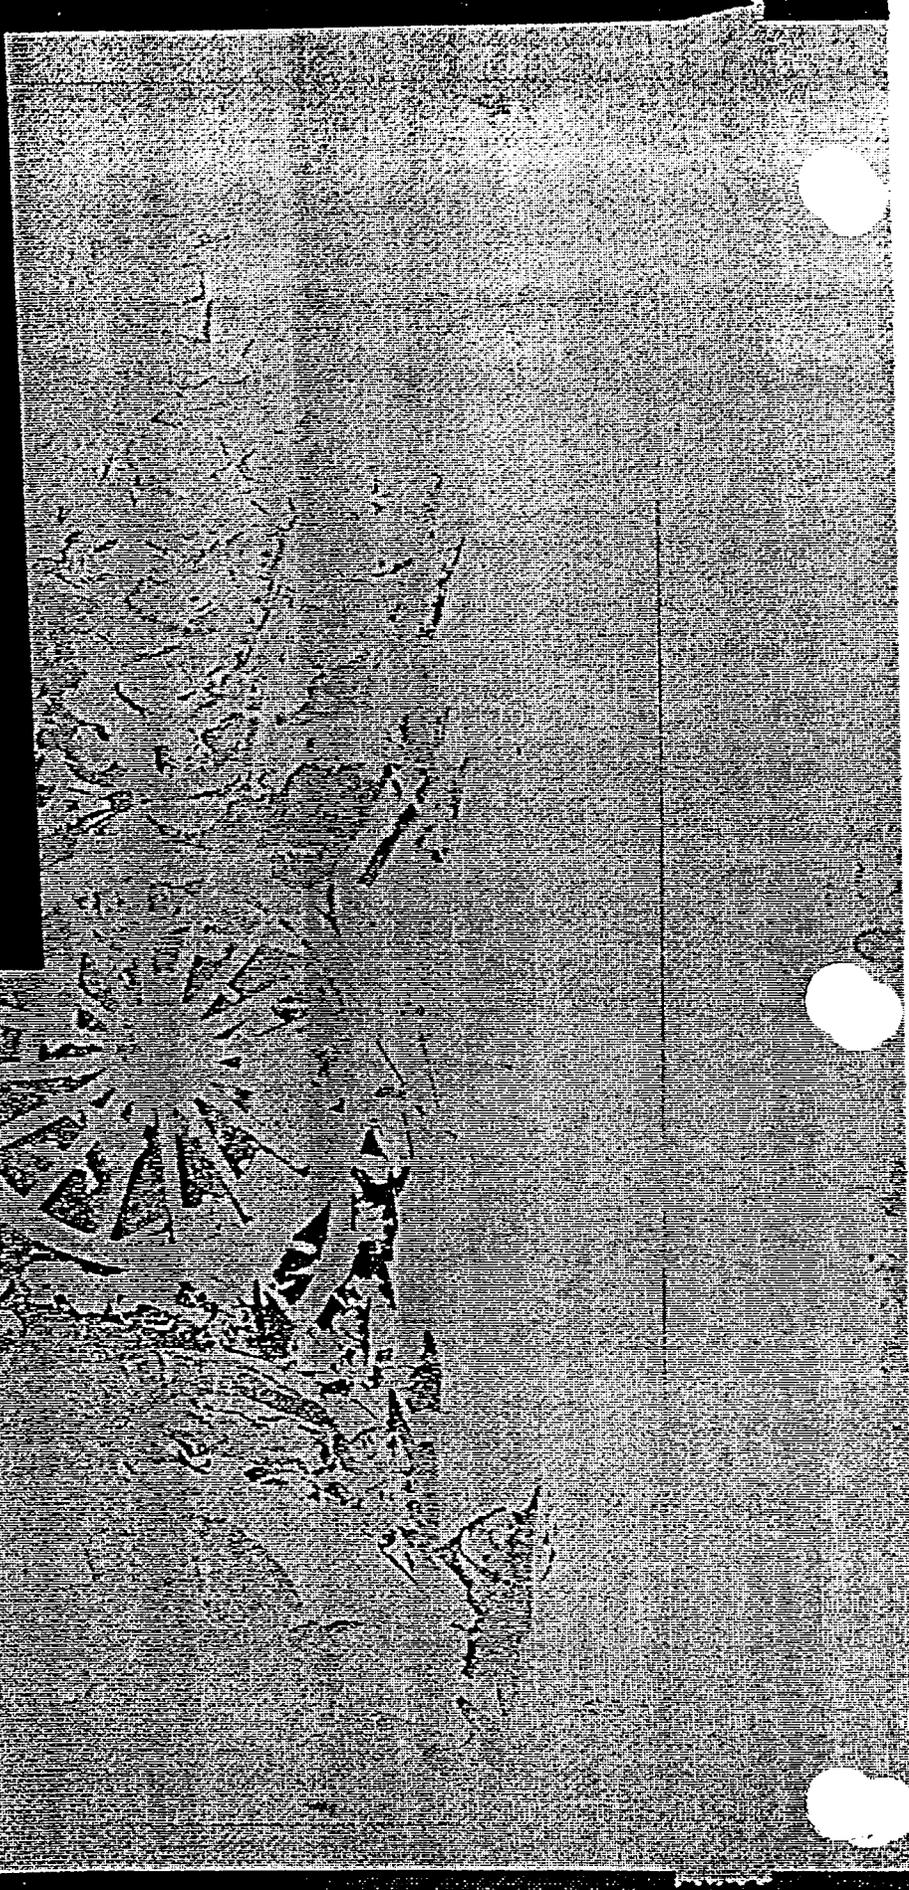

Camp McClellan is a picturesque place, but there was worlds of hard work to be done after the carpenters and roadworkers, plumbers and telephone men passed on. Axes and picks and shovels were known to every man. But they were never so busy that you couldn't get back a cherry answer and a smile.

ADVANCED TRAINING—Instruction at the Chemical Corps School includes courses in firing of specialized chemical weapons. Here, students prepare to fire 4.2 mortar, one of the most effective chemical warfare weapons now being used in Korea. A large percentage of the instructors are Korean veterans who have learned to respect the effectiveness of this weapon.

commanded the famed Second Chemical Mortar Battalion in Korea. Lt. Vestal was also assigned to the Battalion during his Korean service.

"And another thing, Adelbum! We want to know why we ain't received any cookies from Myrtle since you've been mail clerk!"

THERE SHE BLOWS—Members of the Fort McClellan Demolition Team seek the safety of a log and dirt bunker as a dud found on the Washington Rocket Range is safely exploded to insure that it will not endanger troops training in the area. Maj. Harry E. Avery (extreme left) post ordnance officer, smiles approval of the team's efficient work.
